

Full M2M Quad MIM

Brand: Smartjac Industries Inc
Product Code: SMAG100FQUAD

Short Description

Semiconductor packaging (SMD) resistant to high temperature (105°C), shocks, vibrations and humidity.

Description

- Miniaturized standardized format (TS 102.671)
- Resistant to theft
- Semiconductor packaging (SMD) resistant to high temperature (105°C), shocks, vibrations and humidity
- Industrial grade - industrial qualification (JEDEC)
- Exclusive extended Life mechanism to endure a longer life span

Full M2M Quad

- Industrial grade
- M2M Industrial
- Extended endurance
- - 40°C / +105°C

Benefits

- All products are Java Card 2.2.1, Global Platform, GSM standard compliant.?

- MIM Key Features
- Field-proven solution
- Designed for industrial applications
- Built for an extended life span thanks to the Extended Life Mechanism
- Highly secure
- Associated Technology
- Java™ Card OS
- Advanced EEPROM endurance
- Operator Benefits
- Simplified SIM logistics and reduced costs
- Helps mobile operators claim and retain a significant stake in this new market
- Warranty extension according to customer specifications
- Benefits for M2M Value Chain
- Easy to integrate
- M2M industrial qualification (JEDEC)
- Avoid SIM manual manipulation (FullM2M)
- Optimizes logistics
