iCLASS® ID Bands are the perfect access control solution for facilities, attractions and services. Wearable, waterproof secure wristband credentials for demanding environments.

Description

Overview

iCLASS® ID Band

HID Global's iCLASS® ID Bands are the ideal access control solution for active environments. The wristbands are comfortable, durable, and allow convenient access to facilities, attractions and services—for temporary or long-term use. The device delivers a seamless experience for managing access in amusement and water parks, summer camps, sports and fitness centers, and healthcare environments. The ID Bands have a variety of applications, including use for locker and vending machine access, or membership and loyalty programs. In healthcare settings, the wristband can be used to record patient use of amenities, treatment and therapy sessions.

iCLASS ID Bands deliver the following benefits:

Convenient – Comfortable, lightweight and hypoallergenic wristbands designed for active environments.

Durable form factor – Built to perform in harsh environments, the reliable iCLASS ID Bands can withstand exposure to the elements, continuous immersion in water and constant motion.

Secure – Enhanced multi-layered security provides added protection for identity data.

Cost effective – Value-priced radio frequency identification (RFID) credentials in a reusable form factor.
