
Samsung Video Analytics

Brand: Smartjac Industries Inc
Product Code: SMA1003NEXS

Short Description Smart Video Analytics

Every piece of your video surveillance footage tells a story.

Description Smart Video Analytics

Detect, Analyze and Respond

Massive amounts of video data are collected but most are left unused. Our intelligent video analytics solution detects and analyzes meaningful data effectively and swiftly to suit your specific needs.

What can Video Analytics do for you and your business?

Reduce crime and increase safety

Collect evidence and enable accurate situation monitoring, and act fast to deter unwanted behaviors and activities.

Improve marketing promotion effectiveness

Measure the effectiveness of marketing promotions by comparing crowd behavior before

and after the promotion period.

Make the security process more efficient

Reduce the need for extra operators monitoring cameras by utilizing advanced and automated security and safety services.

Unleash actionable business insights

Understand behaviors with business intelligence analyzed from video data visually expressed on the dashboard and in reports.

Multi-layered authentication

Enhance security at warehouses, offices, governmental buildings, factories and laboratories with multi-layered authentication access control systems with biometrics and smart cards.

Business intelligence for retail

Retailers can analyze shopper information and monitor their stores to improve the quality of shopper service.

Urban surveillance for smarter cities

Cities today are enhancing IT services and getting smarter about safety and security, using complex data from cameras and environment sensors to manage urban areas.
